

Investment Objective

The US Stars Equity fund seeks to generate long term capital growth by investing in a concentrated portfolio of American companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term investment horizon. We do not follow benchmarks and always invest in quality.

Quality for a company means strong competitive positions, operating in good and growing industries, the financial strength to weather adversity and strong management teams with track records of value creation.

We seek to identify undervalued quality growth companies where the scale or persistence of growth is underappreciated by the market and there is the prospect of significant capital growth.

Performance since launch on 30th Sept 2024 is that of the Fund's A1 USD Share class. Prior to launch Performance is that of J. Stern & Co.'s US Stars Strategy, a simulated or hypothetical portfolio, that has been a standalone strategy since 1st June 2023, unhedged, which the Fund follows. Since 1st October 2012 performance is total return (with dividends reinvested) and net of 1% fees per annum, deducted 0.25% quarterly in arrears. Prior to 1st June 2023 (and from inception on 1st Oct 2012) performance is that of the US primary listed holdings of the World Stars Global Equity Strategy (and so without any allocation to cash), with performance reduced by 0.25% quarterly in arrears to represent 1% fees per annum. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI USA NTR is designed to measure the performance of the large and mid-cap segments of the US market. With 593 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 30th April 2026.

Portfolio Comment

The US Stars portfolio rose 8.7% in April, modestly trailing the broader market, which gained 10.5%.

Markets rebounded during the month, supported by a robust earnings season and hopes of de-escalation in the Middle East. Over half of our portfolio reported quarterly results, with updates broadly encouraging. That said, some management teams noted the ongoing impact of the conflict in Iran and highlighted continued geopolitical uncertainty.

Among the strongest contributors were *Alphabet*, *Lam Research*, and *Amazon*. Alphabet rose 34%, driven by exceptional revenue growth of 63% in Google Cloud, alongside accelerating momentum in Search advertising revenues. The company continues to demonstrate its leadership in AI. Lam Research gained 26%, reflecting increasing confidence in the semiconductor capital equipment cycle, underpinned by improving memory trends and sustained AI-driven demand. The company also raised its wafer fabrication equipment (WFE) industry outlook to over US\$140bn, reinforcing this positive view.

Amazon rose 27% after delivering results ahead of expectations, with strong AWS growth and better-than-expected guidance for the next quarter. Management also highlighted its strong positioning in AI data centres with a significant backlog of orders.

On the negative side, *Nike* declined 16%, as the turnaround in China is taking longer than anticipated. While the company is executing on its innovation and recovery strategy in North America, a weaker consumer environment in China continues to weigh on performance.

There was no portfolio activity during the month. We remain confident in the long-term prospects of our holdings and the structural growth opportunities across the businesses in which we are invested.
