

Investment Objective

The US Stars Equity fund seeks to generate long term capital growth by investing in a concentrated portfolio of American companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term investment horizon. We do not follow benchmarks and always invest in quality.

Quality for a company means strong competitive positions, operating in good and growing industries, the financial strength to weather adversity and strong management teams with track records of value creation.

We seek to identify undervalued quality growth companies where the scale or persistence of growth is underappreciated by the market and there is the prospect of significant capital growth.

Performance since launch on 30th Sept 2024 is that of the Fund's A1 USD Share class. Prior to launch Performance is that of J. Stern & Co.'s US Stars Strategy, a simulated or hypothetical portfolio, that has been a standalone strategy since 1st June 2023, unhedged, which the Fund follows. Since 1st October 2012 performance is total return (with dividends reinvested) and net of 1% fees per annum, deducted 0.25% quarterly in arrears. Prior to 1st June 2023 (and from inception on 1st Oct 2012) performance is that of the US primary listed holdings of the World Stars Global Equity Strategy (and so without any allocation to cash), with performance reduced by 0.25% quarterly in arrears to represent 1% fees per annum. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI USA NTR is designed to measure the performance of the large and mid-cap segments of the US market. With 593 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 30th June 2026.

Portfolio Comment

The US Stars portfolio declined -0.2% in June, modestly outperforming the broader market, which fell -0.9%.

Amphenol (+19%) is a key beneficiary of AI-related investment. Its high-speed connectors and cables are critical components of the networking infrastructure in data centres. *Lam Research* (+36%) rose strongly as demand for its semiconductor manufacturing equipment remains robust, supported by increasing investment from memory chip producers expanding production capacity. After its Q1 results *Home Depot* (+12%) reaffirmed its full-year guidance and highlighted the expected benefits from recent acquisitions.

Salesforce (-18%) and *Intercontinental Exchange* (-16%) both underperformed as the market rotated towards AI infrastructure and semiconductor-related stocks. However, we believe that the risks of AI-related disruption are overstated and that both companies are well positioned to benefit from AI through enhanced products, improved productivity and delivering long-term value to customers.

During June we initiated a position in *Arista Networks*, a leading provider of networking equipment. We believe that networking will become increasingly critical within data centres as the need for low-latency connectivity and efficient traffic management continues to grow. We expect sustained growth in demand, underpinned by a strong order pipeline and customer commitments, leaving Arista well positioned to benefit from rising capex on data centres.

We exited Idexx Laboratories as veterinary visit trends remain subdued, reducing our conviction in the near-term outlook.
