

## Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

## Portfolio Comment

The main global themes have been continued evidence of a mid-cycle slowdown, rather than a more material downturn; increasing signs of accommodative action by policy makers, led by the Fed's 25bp cut on 31st July; and the implementation of further tariffs by both the US and China. Investor concerns over the escalation of the trade dispute have added to more general fears over political uncertainty and economic weak spots such as manufacturing in the Eurozone.

Against this background, the 0.7% fall in the MSCI World index, after an 21% rise from January to July, was a muted reaction and evidence of the value that still exists in global equities. This is well illustrated in the US, where the 1.95% trailing yield on the S&P 500 is significantly above the 1.5% yield on 10 year Treasuries.

Our portfolio continued to outperform, supported by robust messages on current trading from the vast majority of our holdings in their Q2 results. Performance was led by two global consumer stocks, EssilorLuxottica and Pernod Ricard, which both rose over 9%. American Tower, also up 9%, had another strong quarter with 7.5% tenant billings growth in the US, and underlying data usage continuing to grow at 25-30% across its major markets.
