

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

5 Year World Stars Portfolio Performance, EUR

Performance Analysis

	Cumulative							Annualised		
	Feb-20	3 Months	2020 YTD	1 Year	3 Year	5 Year	Since Inception	3 Year	5 Year	Since Inception
Portfolio	-6.4	-3.8	-5.0	+14.3	+37.4	+59.0	+138.5	+11.2	+9.7	+12.4
<i>MSCI World</i>	-7.7	-6.1	-7.1	+8.8	+20.8	+39.1	+128.5	+6.5	+6.8	+11.8

Performance is the Net Asset Value (NAV) of the World Stars Global Equity Fund ("Fund") A1 EUR Share class, calculated daily, launched on 13 May 2019. Prior to launch date performance was that of the World Stars EUR Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations.

Portfolio Comment

Concern over the impact of COVID-19 has driven a swift correction in equity markets. Over the last week of trading in February the MSCI World and S&P 500 indices fell by 12.1% and 12.6% respectively in EUR, down from all-time highs earlier in the month. Meanwhile, risk aversion by investors pushed the yield on the ten year US Treasury down to a historic low of 1.03%.

Our portfolio declined in February but extended the record of strong relative performance over the last five years. With our intense focus on quality and value we aim to build resilience into our portfolio, investing in companies with strong business models, structurally attractive industries and robust balance sheets.

We are already seeing positive reports of a slowdown in the rate of infection in China but expect the news flow on COVID-19 in the US and Europe to get worse before it gets better. The key ongoing risk is a credit-led collapse of markets, which we judge to be low given that central banks are on high alert and have taken significant steps to ease monetary conditions and avert liquidity issues.

We are instead encouraged by the strong fundamental results reported by the companies in our portfolio in their full year results. Whilst the uncertainty surrounding the outbreak and its impact has led companies to be cautious about their outlooks, the strength of their businesses and resilience of their balance sheets means that this represents a compelling buying opportunity.
