

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Portfolio Comment

Global GDP looks set to end the year with solid growth of 3% and clear signs of faster progress in 2020, despite business investment and trade volumes being impacted by the US trade dispute with China and other issues. The consumer environment remains favourable in many large economies with low interest rates, solid employment and real growth in disposable incomes. Policymakers are supportive as they do not want to unsettle economies or markets given the uncertainties.

Equity markets have reached new highs helped by the yield curve, with long-term interest rates close to record lows, and a positive third quarter results season across many leading companies.

Our portfolio has performed strongly this year, in line with the global equity market, and is significantly ahead over three and five years. With its emphasis on quality companies there has been some impact from the recent sector rotation. During the month Adobe rose by over 11% following its Investor Day with a message of an expanding addressable market and an even stronger competitive position across creativity, digital documents and customer experience management. LVMH agreed to buy Tiffany in a move that will double its sales in Watches & Jewellery. LVMH's stock has now appreciated by 60% this year, our single best performer in the portfolio.
