

Investment Objective

The World Stars Fund Global Equity seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon and always seeking to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Portfolio Comment

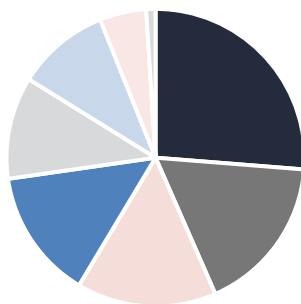

We remain positive about the global economic outlook. The consumer remains in robust shape in many large economies, including Europe and the US, and policymakers continue to be responsive. There are now clear signs of progress in the US-China trade dispute.

In equities the MSCI World, S&P500 and Nasdaq indices all reached new record highs. This is partly driven by low interest rates, but more so by the reported results across many leading companies during the Q3 results' season. The news flow from our own companies has been strong. Most have lifted their underlying earnings guidance, some have left it unchanged, and none have reduced it.

Facebook's Q3 revenues rose by 29% with renewed expansion of the user base in North America and clear evidence of share gains in the digital advertising market. The scale of its global network continues to drive significant top-line growth with 35% EBIT margins. LVMH's Q3 sales increased by 11% at constant currency, including 19% in its largest and most profitable division of Fashion & Leather Goods. The potential acquisition of Tiffany would double its sales in Watches & Jewellery and boost LVMH's clout in the key US market. Alphabet and Amazon grew Q3 sales by 22% and 25% respectively.
