

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Portfolio Comment

After its strong performance last year, our World Stars Global Equity fund consolidated in January in line with global equity markets.

Many of our companies reporting full year results for 2020 have produced broad evidence of a strong improvement in business trends. In many cases management teams have raised their forward guidance for earnings in 2021 and some also in 2022.

Abbott (+13%) was the top performer. It reported outstanding Q4 results with organic sales up 28%, including 300 million Covid tests, and new EPS guidance for 2021 some 8% higher than the previous consensus for 2022. Similarly, ThermoFisher (+9%) reported Q4 revenues up +54%, including \$3.2 billion from Covid-related services.

Despite the real and perceived issues, Facebook achieved 33% revenue growth in Q4 and a 44% rise in EBIT. The total monthly active users across the family of apps rose by 13% to 3.3bn.

With its tight focus on high-growth segments of the electronics market, Amphenol reported 11% organic growth in Q4 revenues led by mobile devices, industrial and automotive.

We remain optimistic for the year. The major factors will be further vaccine approvals, accelerating vaccine roll-outs, greater clarity about variants, and increasing confidence of a powerful global economic recovery taking hold in the second half. That is why inevitable setbacks should be seen as a buying opportunity for long-term investors.
