

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Portfolio Comment

Strong results reported by our companies for the fourth quarter 2020 drove our World Stars Global Equity strategy to a new high in early February before retracing along with markets in the face of concerns over global inflation and rising interest rates.

Our digital platforms have dominated the headlines, with strong revenue growth, market share gains, margin expansion and cash generation. *Alphabet* (+11%) delivered 23% revenue growth and an exceptional rise in EBIT margins to 28% (20%). Similarly, *Amazon's* (-3.5%) extraordinary 44% revenue growth to USD125bn drove Q4 EBIT margins from 4.5% to 5.5%.

The anticipated recovery in global travel benefited *EssilorLuxottica* (+15%), the leading manufacturer of sunglasses. It will also boost our two payments holdings. A recovery in higher margin, cross-border transactions will provide an additional boost to the secular growth drivers of e-commerce, contactless and B2B payments.

We have added a position in *Salesforce*, a leading enterprise software business targeted at front office applications. The company has delivered revenue growth of over 20% CAGR and has an 18% share of a market that is forecast to expand by 75% over 2020-25.

We expect inflation to rise and rates to increase as part of the recovery we look forward to this year. We are not concerned given our companies' ability to increase their volumes and to raise prices in such an environment. That is why we believe that any bouts of volatility should be viewed as opportunities.
