

## Investment Objective

The Star Multi-Asset Income Fund's investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes; Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

- 35-55% - Equities allocation to drive capital growth
- 25-45% - Credit allocation to generate income
- 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion, and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.

Performance is the Net Asset Value (NAV) of the Star Multi-Asset Income Fund ("Fund"), A1 USD Share class, calculated monthly, launched on 01 October 2019. Prior to launch date performance was that of the Star Multi-Asset Income strategy, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Composite Comparator is the daily performance of the following comparators: MSCI World (30%), Bloomberg Barclays Global High Yield (50%), HFR Global Hedge Fund Index (20%)

## Portfolio Comment

Our Multi-Asset Income fund had another positive month finishing up 0.8% for the month and up 2.1% YTD. March was marked by higher volatility and whereas equities finished strongly, up 2.7%, our fixed income portfolio ended the month on a slightly weaker note, at -0.5%, although still positive at 0.8% YTD. Non-Correlated Assets also had a strong month with a positive performance of 1.3%, now at 0.8% YTD.

Our equity portfolio benefited from the strong contribution from our more economically sensitive "Industrial & Infrastructure" names with *Raytheon*, *Otis*, *Honeywell* and *Eaton* leading the charge. On the other hand, our "Digital Transformation" names were somewhat lagging following the rotation trend witnessed earlier in the year

Optimism in a substantial economic surge in H2 resulted in US 10 year bond yields rising rapidly to new highs for the year around 1.75%. This triggered some weakness in the asset class with the higher quality most secured part of the market correcting downwards also dragging the high yielding bond segment across both emerging and developed markets. Turkey saw some profit taking following the resignation of the Governor of the central bank.

## Fund Asset Allocation

- Equity 40%
- Credit 35%
- Non-Correlated Assets 24%
