

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our companies have continued to report strong performance during the Q2 results season, with increased confidence from management teams over the trading outlook.

Alcon's (+14%) Q2 results revealed a broad acceleration in top-line growth and operating margins of 18.2%. In surgical equipment, where it is the global No 1 in cataract and vitrectomy (retinal), sales were 14% higher than Q2 2019 with clear evidence of market share gains. The vision care division also achieved faster growth in both contact lenses and ocular health products.

Salesforce's (+10%) Q2 results underlined the strength of its competitive position in enterprise software as investment in digital transformation increases in the post-Covid world. Revenues increased by 24% and the operating margin rose to 20.4%. Early indications on the \$27.7 billion acquisition of Slack are positive.

Amongst our industrial holdings, *Amphenol* (+6%) and *Eaton* (+8%) reported Q2 organic sales growth of 22% and 27% respectively, with significant margin expansion. These companies have broad exposure to higher business investment across automotive, aerospace, automation and communications driven in large part by the 'electrification of everything'.

The Chinese government's measures to increase its influence on the big Chinese technology companies and to emphasize 'common prosperity' have had a significant impact. We have no holdings listed in China and believe that a wider income distribution will be positive for China and will increase demand for the consumer and luxury goods which our companies sell to Chinese customers.
