

## Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

## Portfolio Comment

After strong gains this year our World Stars Global Equity fund gave up ground in September in line with global markets. Supply chain issues in some industries, higher inflation numbers and an increased expectation of higher interest rates in 2022 stimulated profit-taking.

Despite these well-known pressures, we are confident in the outlook for our high-quality companies. They are typically market leaders in long-term growth industries, relatively well-insulated from the main areas of cost pressure such as labour and commodities, and price leaders in their industry based on clearly differentiated products, strong brand franchises and a record of innovation.

*Pernod-Ricard* (+7%) was the top performer. For the full year it reported 10% organic revenue growth and an 18% rise in EBIT. The results provided broad evidence of continued premiumisation and share gains in most major markets. We concur with the management's view that China's Common Prosperity policy, with its aim of doubling the number of middle-class citizens to 800m by 2030, will provide a clear boost to global spirits and consumer goods companies. *Diageo* (+3%) also produced an upbeat trading statement at the end of the month.

At its Investor Day *ThermoFisher* (+3%), the leading global life sciences company, raised its estimate for long-term revenue growth to 7-9% p.a. from 5-7%. Including 40-50bps of annual EBIT margin expansion, EPS growth is now expected to be 13-15% p.a. Following this confident message, with faster growth in the core business post-Covid, we raised our 2022 EPS estimate by 7%.
