

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Consistently strong trading results from many of our companies drove a significant recovery in the World Stars Global Equity fund in October. This occurred as global equity markets were boosted by investors seeking protection from higher inflation and seeking to limit their exposure to rising interest rates.

Six of our holdings rose by 10% or more. Three in digital transformation, and one each in consumer, healthcare & life sciences and industrials & infrastructure. This underlines the breadth of commercial progress being achieved by companies across our four broad sectors, despite the well-known challenges of input cost inflation and supply chain pressures.

Alphabet's (+11%) Q3 results showed further substantial growth in revenues, margins and cash generation, which have combined to drive the stock up 70% this year. Its high-margin advertising revenues rose by 44% and the group EBIT margin in Q3 rose to 32% (24%).

L'Oreal's (+10%) Q3 sales increased by 14% on an organic basis and were 15% above Q3 2019. The company is currently growing at almost twice the rate of the global beauty market with particular gains in L'Oreal Luxe, Active Cosmetics and Professional.

Our two payments companies, *Mastercard & Visa*, both reported revenue growth of 29% in Q3, with EBIT margins of 57% and 66% respectively, but a relatively slow recovery in travel spending and cross-border payments. We remain confident in the outlook with multiple growth drivers in both stocks.

GICS Sector Allocation

- Health Care 23%
- Information Technology 20%
