

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13th May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund rose strongly in December. Most of our companies continue to report on robust trading and manageable pressures from inflation. Fears over the Omicron variant have been assuaged by evidence of a lower viral impact and by the efficacy of vaccines. Actions by policymakers, notably the Fed with its revised plan to end the QE programme in March 2022, have boosted confidence in the strength of the economic recovery.

Performance for the month was led by companies whose prospects are influenced by the immediate Covid-related trading environment, including *Mastercard* (+14%) and *Visa* (+12%), by healthcare companies, and by our industrial holdings which will benefit from the upcoming super-cycle of capital investment, including *Amphenol* (+9%), a leading supplier to the industrial battery and renewable energy segments, and *Eaton* (+7%), a key beneficiary of the accelerating shift towards electrification.

We will have to be vigilant about inflation and the policy response that would follow if inflationary pressures become more intense and prolonged. Our portfolio is focused on leading global companies with enduring competitive advantages in attractive long-term growth industries, and an ability to be price leaders. We look to avoid industries with structural weaknesses such as high labour intensity, a lack of price discipline or low margins.

We anticipate a strong economic recovery in 2022, driven by consumer spending, higher industrial capex and an easing of supply chain disruption. Uncertainties around inflation will remain, but we believe that overall it will provide a favourable background for our World Stars companies.
