

## Investment Objective

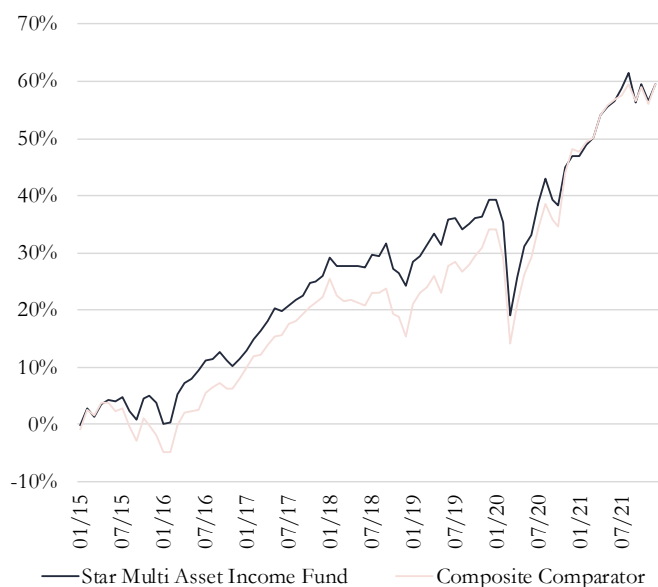

The Star Multi-Asset Income Fund's investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes; Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

- 35-55% - Equities allocation to drive capital growth
- 25-45% - Credit allocation to generate income
- 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion, and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.

## Star Multi-Asset Income Fund Performance, USD

## Performance Analysis

Performance is the Net Asset Value (NAV) of the Star Multi-Asset Income Fund ("Fund"), A1 USD Share class, calculated monthly, launched on 01 October 2019. Prior to launch date performance was that of the Star Multi-Asset Income strategy, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Composite Comparator is the daily performance of the following comparators: MSCI World (30%), Bloomberg Barclays Global High Yield (50%), HFR Global Hedge Fund Index (20%)

## Portfolio Comment

Our Multi-Asset Income Strategy had a good month at +1.9% in USD, taking CY2021 performance to +8.5%, and a CAGR of +6.9% net since inception in 2015. Equities rose +3.7% in the month, making +22.0% for CY2021. Credit delivered +0.2% in December and a +6.4% total return for the full year.

Equity performance was driven by MedTech names such as *Alcon* (+12.8%) and *Abbot Labs* (+11.9%) both of which benefitted from the uptick in surgical and minimal invasive therapies due to the easing of lockdowns. *Mastercard* (+14.1%) was driven by greater than expected seasonal transaction volumes and an acceleration in international travel in the previous months.

Our credit portfolio included significant gains from *Pemex* (+5.3%) and *Kosmos Energy* (+3.5%), bolstered by strong and sustained commodity prices. The president of Mexico Andres Manuel Lopez Obrador promised a \$3.5bn capital injection into Pemex which caused bond prices to react positively.

Among our non-correlated assets, *Greencoat UK Wind* (+7.3%) performed strongly due to increasing UK electricity spot prices through December. Lastly, *Hipgnosis Songs Fund* (+1.9%) rounded out the top-performing non-correlated assets with a positive capital markets day in the middle of the month which boosted sentiment.
