

Investment Objective

The Star Multi-Asset Income Fund's investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes; Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

- 35-55% - Equities allocation to drive capital growth
- 25-45% - Credit allocation to generate income
- 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion, and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.

Performance is the Net Asset Value (NAV) of the Star Multi-Asset Income Fund ("Fund"), A1 USD Share class, calculated monthly, launched on 01 October 2019. Prior to launch date performance was that of the Star Multi-Asset Income strategy, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Composite Comparator is the daily performance of the following comparators: MSCI World (30%), Bloomberg Barclays Global High Yield (50%), HFR Global Hedge Fund Index (20%)

Portfolio Comment

The multi-asset income fund finished the month down 3.8% (-7.3% YTD). Although equities were the most volatile asset class contracting 3.9% on the month (-9.7% YTD), the fixed income portfolio, initially resilient, also gave up 4% in February (-3.5% YTD) as a result of our Ukrainian exposure. By contrast the non-correlated funds were flat.

In our equity portfolio, Meta's (-33%) results highlighted increased competition and other pressures. In our digital holdings Adobe (-12%) and Salesforce (-9%) both suffered from multiple compression. And LVMH's (-8%) decline was caused by fears for luxury goods sales, despite powerful Q4 results. Overall, we believe our quality companies are well-placed to weather this adversity. They have minimal direct exposure to Russia and Ukraine.

The credit portfolio was impacted by the conflict in Ukraine which led to an aggressive sell-off in MHP (-49%) and Kernel (-58%). These two holdings account for 1.6% of the fund's assets.

In the non-correlated assets, Hipgnosis (-8%) was the significant detractor due to headlines surrounding Neil Young. Greencoat UK Wind (+6%) benefitted from increases in spot energy prices.
