

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

The month was heavily impacted by Russia's invasion of Ukraine last week. Meanwhile, many of our companies reported strong results and positive outlooks. Our World Stars Global Equity fund declined by month end but closed well above its earlier lows.

The geopolitical outlook remains highly uncertain with no clear picture on the scope or duration of hostilities in Ukraine and their impact on the global economy. However, it is evident that they will accelerate and amplify the changes to global supply chains already in train as a result of the Covid-19 pandemic.

Our companies are well placed to weather this adversity. They have a global footprint with minimal direct revenues in Russia or Ukraine, and a low exposure to the primary areas of inflationary pressure. They are leaders in attractive, long-term growth industries, with pricing power and strong balance sheets. During previous bouts of volatility they have used their business models and financial resources to strengthen their competitive positions.

Raytheon (+14%) was the top performer. In February it reaffirmed the strong recovery in commercial aftermarket revenues. Although the conflict is likely to cause disruption to air travel, the airlines are experiencing a major rise in underlying demand post-Covid.

Meta Platforms' (-33%) Q4 results highlighted increased competition, a shift in engagement with negative mix and some impact from Apple's iOS changes. We believe that the market has over-reacted and see substantial upside from this point based on Meta's scale, high margins and breadth of growth levers. On revised earnings forecasts, the P/E is 14.5x for CY2022 and 12.5x for CY2023.
