

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13th May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund declined in May but closed the month 5% above its low point this year. The news flow and reported results from the large majority of our companies has remained very robust in May, despite the economic and geopolitical uncertainties. Markets have been encouraged by various indicators including the decline in core PCE inflation in the US to 4.9% in April, the fall in the 10 year treasury yield to 2.85% from over 3.1% in early May, and initial steps to re-opening in China.

Two of our digital stocks had strong Q1 results. *Nvidia's* total revenues grew 46%, including 83% in its largest data centre division, with a 90 basis points increase in gross margin to 67.1%. *Salesforce* reported 26% revenue growth in Q1 in constant currencies. For the full year it lowered its revenue guidance to +20% but increased its targeted operating margin to 20.4% (18.7% in 2021). Importantly, the company noted a "very strong" outlook for demand.

Four of our top ten stocks were in healthcare & life sciences. *Alcon* reported 16% organic sales growth in constant currencies, with underlying recovery and significant market share gains across surgical and vision care. It lifted its guidance for full year EPS by 6%. With its Q2 results, *Becton Dickinson* reaffirmed its target of lifting the EBIT margin from 19.6% in FY2021 to 25% in FY2022.

We believe that the current pullback in our World Stars fund is a great opportunity to invest in high-quality global stocks in long-term growth industries after a significant compression in valuations. Our portfolio should deliver 10% p.a. revenue growth over 2022-23 with margin expansion and powerful cash flows.
