

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 14th June 2021 is that of the Fund's A1 CHF Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars CHF Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund recovered strongly driven by robust second quarter results from a large number of our companies and by more balanced macroeconomic news flow.

Although the US economy has entered a technical recession with its 0.9% fall in Q2 GDP, this has to be kept in perspective compared to Covid-recovery growth of approximately 6.5% through the first half of last year. Markets were reassured by the US Federal Reserve's 75 bps interest rate rise that came with a statement that it was determined to achieve a soft landing and that its policy would be data driven from meeting to meeting going forward. Inflation remains a concern but should fall significantly in 2023 with lower growth, easier comparisons, lower commodity prices and supply responses in the production of goods and in labour supply.

Of our companies reporting second quarter results so far, 80% have issued unchanged forward guidance or disclosed positive information on trading that would justify increased estimates in constant currencies for 2022. Trading results and outlook statements have been notably robust from companies focused on medium to high-end consumers including *LVMH* (+16%) and *L'Oreal* (+12%), from industrial stocks such as *Amphenol* (+20%), and in payments including *Mastercard* (+12%) which reported Q2 organic revenue growth of 26%.

We do not underestimate the challenges but we believe that the pricing power, track record of innovation and competitive strengths of our high-quality companies give them a strong platform on which to deliver continued growth in earnings and cash flow.
