

Investment Objective

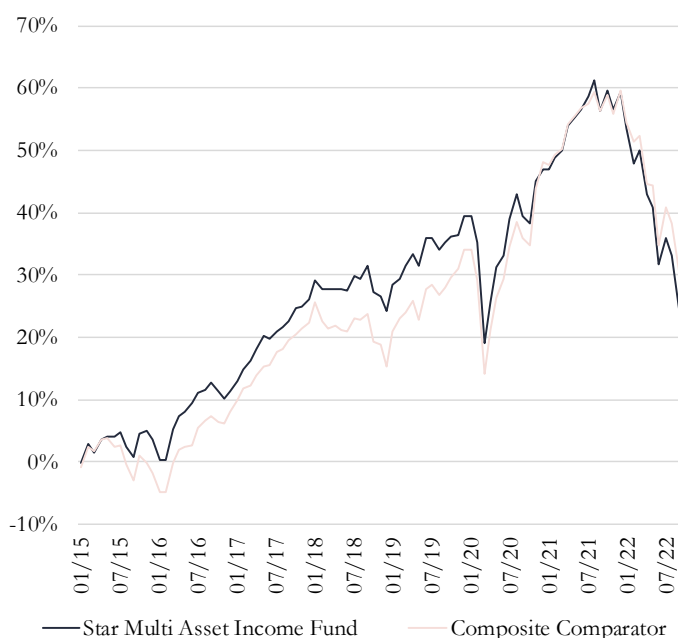

The Star Multi-Asset Income Fund's investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes; Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

- 35-55% - Equities allocation to drive capital growth
- 25-45% - Credit allocation to generate income
- 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion, and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.

Portfolio Comment

Despite the previous month's weak performance, markets were still in a risk off mood for the month of September with all asset classes coming under pressure. The FOMC hiked the Fed Funds Rate by 75 basis points to 3.0%-3.25% and signalled more hikes to come, as the Fed appeared willing to weaken the labour market in its efforts to bring inflation down. This led to the portfolio being down 6.5% for the month.

With this in mind, equities were the main detractor to the performance last month led by names such as *Adobe* (-26%) reacting to the announcement of the acquisition of *Figma*, *Nvidia* (-20%) and *Meta* (-17%).

The fixed income portfolio performance similarly was impacted by the weakening of global risk sentiment and continued monetary policy tightening. *CLISA* (-31%), *Tullow* (-18%) and *DP World* (12%) were the main detractors. *Tullow* was weak over the month on the back of the merger with *Capricorn Energy* failing.

Non-correlated assets detracted from the portfolio by performance in names such as *Hipgnosis* (-23%) and *Sequoia* (-12%).
