

## Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

## Portfolio Comment

The World Stars Global Equity fund declined in line with the global equity market. Relief about solid second quarter results from many companies was replaced by renewed concerns about inflation, interest rates, the possibility of a severe recession, and the Russia/Ukraine conflict. The yield on 10 year US Treasuries rose from 3.1% to 4% in September, although it has now fallen to below 3.7%.

Our companies continued to report robust business performance. Both our spirits stocks rose in the month, led by *Pernod Ricard* (+3%). In its FY2022 results Pernod reported 17% organic revenue growth on flat FX, higher gross margins and a combined 5% price and mix gain on its strategic brands. It issued a confident statement on the FY2023-25 outlook in respect of underlying demand, revenues and margins. *Roche* also rose 3% on increased hopes for a positive Phase III read out for its Alzheimer's drug in Q4 2022.

At its capital markets day *Salesforce* (-8%) reiterated its FY2026 goals of US\$50bn revenues and a 25% EBIT margin vs. 20.4% targeted in the current year. This implies 17% CAGR in revenues and underlines the breath of its growth levers across digital transformation.

The upcoming third quarter results season will provide an important update on current trading and the pressures from inflation, slower growth and the strong US dollar. We believe that the majority of our companies are trading well, especially in healthcare, industrials and higher-end consumer. With the sell-off, the prospective 2023 P/E of our high-quality stocks has now fallen below 20x with a 4.7% FCF yield. This feels a low valuation given the strength of their competitive positions in long-term growth industries.
