

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

The World Stars Global Equity fund recovered some ground, supported by robust Q3 results from the majority of our companies. This mirrored the position in the US market as at 31st Oct. where, according to FactSet, of the ~50% of S&P 500 companies which had reported for Q3, some 72% had beaten market expectations.

The macroeconomic background has not changed significantly with limited underlying growth in GDP, inflation still elevated, and no clear indication of when interest rates will peak. At the same time, there are signs that inflationary pressures are easing, including the European gas price, global container shipping rates and the New York Fed's underlying inflation gauge.

Results from our technology stocks were mixed with revenues often lapping a strong quarter in 2021, weak patches in digital advertising such as financial services, the impact of the strong US\$ in many cases, and cost pressures from inflation or investment in future growth. For example, our largest digital holding of *Alphabet* (-2%) reported 11% revenue growth in constant currency, but a 300bps fall in the EBIT margin to 24.8% driven by an increased headcount.

Across our holdings in consumer goods, industrials and healthcare there has been a broad picture of good momentum in revenues, often with an acceleration in Q3, higher margins driven by operating leverage and pricing action, and strong cash flows. The large majority have confirmed unchanged earnings guidance for the full year 2022, with some companies pointing to a modest uplift. Comments on the trading outlook for 2023 have been more muted, but that is the convention for Q3. Our focus has been on the durability of the long-term secular trends which we aim to exploit with these stocks.
