

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13th May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

After a strong rebound in November, our World Stars Global Equity fund declined in December in line with the global equity market driven by macro news flow and prospects of further monetary tightening. The US Fed gave limited weight to the fifth consecutive monthly decline in US CPI to 7.7%, focusing on tight labour markets and stating that there was "more work to do". The ECB pointed to "significant" further increases in rates.

Eight of the top ten performers were in healthcare & life sciences and industrials & infrastructure. These companies have enduring competitive advantages and powerful positions in long-term growth markets. Their supply chain constraints are manageable and price increases are covering much of the input cost inflation. Becton Dickinson's (+2%) Q4 results, with 8.6% revenue growth and higher margins is a good example of this combination.

We expect markets to remain volatile in the first part of this year. The 2022 results season is likely to include downward adjustments to guidance for the coming year. The macro background will remain challenging with slowdowns and possible recessions of varying magnitude, although we expect the US economy to be more resilient than others. From Q2/Q3 lower inflation should point to a peak in interest rates. The current uncertainties over China's sudden economic reopening should give way to a resurgence in activity and ease pressure on global supply chains. As long-term investors we know that we have to be patient. We look forward to a turning point in markets and a new phase of sustained economic growth and higher investment, and are confident that our companies are well-placed to do well in this environment.
