

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 14th June 2021 is that of the Fund's A1 CHF Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars CHF Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund had a strong start to the year. The macro background has been more positive and our companies have reported robust results.

US economic data, in particular strong employment figures, means that the widely expected recession may be moderate if it takes place at all. At the same time broad-based evidence to support a sharp fall in consumer prices in the US and elsewhere during 2023 has now shifted the market's focus to the timing of a peak in interest rates.

The reopening of the Chinese economy after three years of Covid-19 restrictions provides a substantial boost to many global industries, including consumer goods and travel. We expect that the government's renewed commitment to broad-based economic growth will spread across into other areas such as industrials. Five of our companies have 15% or more of their revenues in the Chinese 'cluster', led by LVMH at 24%.

Cost-cutting and share buybacks in technology stocks have been a feature of January. Tech companies are undertaking a 'reset' to match capacity closer to current growth expectations, with an immediate boost to margins and cash flow. A more balanced approach to optimising both growth and shareholder value is a very positive development.

We have initiated a new position in Xylem, a leading global water technology company, which is acquiring Evoqua for US\$7.5bn. The enlarged business with revenues of US\$7bn and EBITDA of US\$1.3bn including synergies has the scale, product set and expertise to deliver share gains in this long-term growth industry.
