

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund rose strongly in March, extending its significant recovery from the November lows.

Most of our stocks continued to report robust trading results. Equity markets also benefitted from increased confidence that there may be a substantial decline in inflation in the second half of the year and that interest rates may be close to their peak. Macro data is inevitably volatile, but the decline in the 10 years US Treasury yield from 4.1% to 3.5% since early March is indicative of this paradigm.

Our technology stocks took all 'top five' positions in the portfolio with an average gain of 19% in USD. Performance was driven by resilient underlying businesses, additional cost-cutting measures and the realization that AI is a substantial opportunity for software, datacentres and semiconductors.

Salesforce (+22%) reported 17% revenue growth in Q4, 5% ahead of expectations, and has guided to a 27% underlying EBIT margin in FY2024 vs. 22.5% in FY2023. The results validated our investment thesis predicated on significant margin improvement and strong cash flows, even with the headwind of elongated sales cycles in some markets. *Meta* (+21%) and *Amazon* (+10%) performed strongly as well.

L'Oreal (+10%) is being driven by resilient demand and share gains in the US and Europe, with a recovery in consumer spending in China expected to accelerate in H2 2023. Greater China accounts 20% of L'Oreal's global sales, second only to *LVMH* (+7%) in our portfolio.
