

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

			Sharpe Ratio	0.43				

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

After strong gains this year our World Stars Global Equity fund consolidated in August, in line with the global equity market. All our companies have now reported results for the second quarter or a comparable period and the picture remains one of robust progress and, in several cases, strong growth with significant upgrades to EPS. Across the 29 companies, five stocks now have lower EPS estimates for the next financial year, 10 stocks are on unchanged estimates, and 14 companies have higher estimates.

Expectations of a soft landing for the global economy have increased, led by the US where GDP growth is continuing (revised to 2.0% for end June, year on year), CPI is a little sticky after a significant decline, but the labour market is now cooling significantly. The latest US data showed a decline in new job openings to 8.8m, the lowest since March 2021, higher unemployment of 3.8% (3.5% July) and a 4.3% rise in average hourly earnings (4.8% July). This combination has raised hopes of a peak in US interest rates and the 10 years Treasury yield fell from 4.34%, a 15 year high, to 4.1% at the month end.

Eaton (+13%) was the top performer, driven by strong Q2 results with organic sales growth of 13% and a 21.6% EBIT margin (+150bps). Through its global electricals business (70% revenues) it has powerful positions in large markets with accelerating growth trends, including electrification, digitalization, data centres and power management. Nvidia's (+6%) Q2 revenues doubled to US\$13.5bn with gross margins of 71%, and it guided to an exceptional US\$16bn of revenues for the third quarter.
