

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Share Class Summary

Share Class	NAV	AMC	OCF*	Minimum	ISIN

World Stars Portfolio Performance, GBP

Portfolio Comment

Global equity markets declined last month due to geopolitical and macro-economic concerns. Our World Stars Global Equity fund outperformed as our quality companies showed resilience and reported robust third quarter results. Of the 25 stocks that have reported, full year earnings estimates are unchanged or higher for 19 and lower for six, including the impact of the strong CHF on three Swiss-listed companies. It continues a pattern set by the second quarter results season, after which 24 of our 29 stocks had unchanged or higher full year estimates.

Leading indicators on economic activity and money supply point to a slowdown and support our view that we are close to the peak of the interest rate cycle. Although US GDP rose by 4.9% year on year in during the third quarter, driven primarily by consumer spending, the yield on 10 years US Treasuries has fallen from 5% to below 4.7% in the last two weeks.

The two largest upgrades to earnings were in our digital stocks. *Amazon* (+5%) reported 11% revenue growth and an operating margin of 7.8%, the highest for ten quarters. Strong advertising revenues, cost savings in ecommerce and scale benefits are delivering substantial growth in profits and cash flow. *Meta's* (0%) Q3 revenues rose by 23% with an operating margin of 40%. The injection of AI and increased user trends (+7% to 4bn monthly active people) is driving faster growth in advertising revenues.

RTX (+13%) was the top performer. It reported 12% revenue growth in Q3 and raised its targeted cash flow through to FY2025 despite the impact of the GTF engine recall programme.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations.
