

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

Our World Stars Global Equity fund rose strongly in December as performance continued to broaden across the portfolio. For 2023 the fund delivered strong returns in absolute and relative terms, closing the year over 5% ahead of the MSCI World index. Within our top ten stocks in December, five were industrials, three in digital transformation, and one each in consumer and healthcare.

As we expected, macroeconomic data continued to moderate with falling inflation and resilient consumer spending. Markets reacted positively to the US Fed's pivot in favor of lowering rates in 2024 while leaving open the possibility of one more increase. US core PCE inflation fell to 3.2% in November, the lowest since April 2021. The Fed now forecasts CPI at below 3% through 2024-26.

Sika (+15%) was the top performer. In the new strategic plan for 2023-28 it is targeting an EBITDA margin of 20-23% (vs. 18.7% in 2022), and faster top line growth driven by market share gains and favourable mega trends in the use of construction chemicals. At the same time, it has accelerated its pathway to net zero in 2050.

Adobe (-3%) has withdrawn from its proposed acquisition of Figma due to regulatory uncertainty. Since the transaction was announced in 2022, Adobe has made substantial progress in incorporating Generative AI into its products, driving additional growth and contributing to a 77% rise in the stock price over 2023.

Looking ahead we expect good progress in earnings and cash flow from our companies, reflecting the strength of their competitive positions in industries with long-term structural growth trends.
