

## Investment Objective

The Star Multi-Asset Income Fund's investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes: Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

35-55% - Equities allocation to drive capital growth  
 25-45% - Credit allocation to generate income  
 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.

## Portfolio Comment

The US Federal Reserve's dovish move at the end of last year continued to bring positive support to risk assets during January. Our portfolio was up 1.3% for the month with a strong performance from equities and fixed income despite more muted contribution from the funds all in US dollar terms.

Equities were particularly strong over the month with names such as Nvidia (+24%) and Eli Lilly (+11%) benefiting from excitement over growth prospects and ASML (+11%) bolstered by positive results.

Fixed Income was positive over the month with Unigel (+15%), Braskem (+12%) and TV Azteca (+11%) all performing strongly.

The non-correlated assets were muted over the month with contributors such as Biopharma (+11%) offset by HICL (-7%) and Hipgnosis (-5%).
