

**Investment Objective**

The Star Multi-Asset Income Fund’s investment objective is to generate an attractive income return on its Portfolio with lower volatility and the opportunity for capital growth.

The Star Multi-Asset Income Fund seeks to achieve its investment objective by investing in three asset classes: Equities, Credit and Non-Correlated Assets. We set bands around the portfolio components as follows:

- 35-55% - Equities allocation to drive capital growth
- 25-45% - Credit allocation to generate income
- 15-25% - Non-Correlated Assets allocation to provide uncorrelated returns with an attractive income yield and reduce overall volatility

The asset allocation is driven primarily by the yield that can be generated by the Credit portion and complemented by the expected capital appreciation of the Equity and Non-Correlated Asset components.
