

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13th May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Fund: US\$239m

Portfolio Comment

Our World Stars Global Equity fund performed strongly in February, outperforming global markets, and is now over 5% ahead of the MSCI World index in 2024. Performance was led by our digital stocks and the top 10 also included five companies spread across consumer, healthcare and industrials. With the fourth quarter 2023 results season now completed, earnings estimates for FY2024 are unchanged or higher for 21 of our 29 stocks.

Nvidia's (+29%) continued on its rapid growth trajectory with Q4 revenues of US\$22bn (\$6.1bn) and gross margins of 77% (67%). Demand for its H100 GPUs and the planned H200 is exceeding supply with exceptional demand across the Nvidia ecosystem for artificial compute and AI applications.

Meta (+26%) delivered powerful Q4 results with revenues +22%, an EBIT margin of 41% (20%) and 21% growth in ad impressions. Generative AI is driving huge advances in the advertising model with lower costs, better targeting and higher conversion. Meanwhile Meta's 'monthly active people' rose by 6% to 4 billion in Q4.

Eaton's (+17%) results underlined the breadth of secular growth across its end markets in power management and electrification, led by data centres, commercial aerospace, utility and EVs.

Walt Disney (+16%) is making strong progress on its strategic revival with an EBIT margin of 16.5% (12.9%) in Q1 and increased confidence in two key targets – the US\$7.5bn cost reduction programme and the delivery of a 10%+ margin in the streaming division. Earnings estimates for FY2024 have risen by c.7%.
