

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Portfolio Comment

After strong gains this year our World Stars Global Equity fund consolidated in April, in line with the global equity market. Robust economic data, led by the US but also with improvement in business activity and consumer spending in Europe, and higher than expected CPI numbers in the US, combined to shift market expectations for rate cuts by the US Fed to the fourth quarter of this year.

In our portfolio, 20 of the companies we have invested in have reported Q1 earnings with a broad picture of good underlying momentum and improving margins. None of these stocks have reduced their guidance for the full year and estimates have increased for a small number.

Strong margin expansion was a common feature of the results from our three digital platforms. *Alphabet* reported 16% revenue growth and an EBIT margin of 32%, *Amazon's* Q1 EBIT margin rose to 10.7% and *Meta's* Q1 EBIT margin increased to 38% including the benefit of 27% growth in advertising revenues. These platforms are delivering powerful financials and strong cash flow with scale leverage, durable business models and a structural boost from AI with greater revenues and increased efficiencies.

Five of our top ten stocks were industrials including *Amphenol*, which has a broad exposure to the 'electrification of everything' with its high-tech connectors and sensors.

GICS Sector Allocation

- Information Technology 24%
- Industrials 17%
- Health Care 16%
