

### Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 14<sup>th</sup> June 2021 is that of the Fund's A1 CHF Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars CHF Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1<sup>st</sup> October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Strategy. The total return index includes price performance and income after tax from regular cash distributions. Source: SIX, Wize, Bloomberg, J. Stern & Co.

### Portfolio Comment

Our World Stars Global Equity fund extended its strong performance, led by *Nvidia* and other digital, healthcare and industrial stocks. The Q1 results season continued and across the eight World Stars companies that reported in May, all but one raised its full year earnings guidance.

There was little change in the macroeconomic background. Core CPI in the Eurozone and US (PCE) appears quite settled below 3%; the yield on the US 10 years Treasury note remained steady at around 4.5%; and market expectations for monetary easing are still for the ECB to move first in Q2, with the US Fed to cut in Q4. Consumer confidence in the US and Eurozone improved modestly.

*Nvidia* (+27%) reported further exceptional progress in Q1 with total revenues of US\$26bn, 18% above Q4, and a gross margin of 79%. Revenues from datacentres rose five-fold to US\$22.6bn year on year. *Nvidia* continues to have excess demand both across the current Hopper platform and for the next generation Blackwell platform. Growth is being driven by rapid expansion of the customer base across large cloud computing providers, enterprises in many diverse sectors and government infrastructure projects.

*Xylem* (+8%), the global water technology company, reported strong Q1 results and a public target to deliver mid-teens EPS growth from market share gains, revenue synergies from the Evoqua acquisition in 2023, and EBITDA margin expansion of 100 bps p.a. through 2027.
