

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th November 2019 is that of the Fund's A1 GBP Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars GBP Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Strategy. The total return index includes price performance and income after tax from regular cash distributions. Source: SIX, Wize, Bloomberg, J. Stern & Co.

Portfolio Comment

Our World Stars Global Equity fund delivered resilient performance during a volatile month. The quality of our companies was epitomised by their Q2 results: across the 29 stocks, market estimates for 23 have either been maintained or raised for the next full year.

The bout of volatility was driven by macro-economics. A shift in monetary policy by the Bank of Japan triggered an unwinding of the yen/USD carry trade. Mixed US economic news included strong July retail sales and a comment from the US Fed that “the time has come for policy to adjust”. The market now expects a first cut in US rates this month, with several further reductions.

Meta (+10%) reported 22% revenue growth in Q2 with an EBIT margin of 38%. Ad impressions rose by 10% with a 10% increase in the average price per ad. Enhanced by AI, improved conversion rates on advertising is stimulating demand from advertisers. Meanwhile Meta's ‘daily active people’ across its Family of Apps rose to 3.27bn, +7% year-on-year.

Consumer stocks represented three of our top ten in August. Valuations of many consumer companies have fallen to multi-year relative lows this year due to pressures on consumers and tough trading comparisons. Both should ease over the next 12-18 months, which should help to refocus the market on longer-term secular growth drivers and low valuations in categories like spirits and luxury goods.

GICS Sector Allocation

- Information Technology 23.4%
- Health Care 17.8%
- Industrials 15.3%
- Communication Services 12.2%
