

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13th May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, a model or hypothetical portfolio, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Net Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Fund. The total return index includes price performance and income after tax from regular cash distributions. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 30th November 2024.

Portfolio Comment

Financial markets in November were dominated by the US election and expectations of policy changes proposed by President-elect Donald Trump, both specific to the US and with international ramifications. Our World Stars Global Equity fund rose strongly, led by technology stocks and industrials. The new administration is expected to adopt a more accommodating stance over the regulatory framework for tech companies and to support a significant increase in US infrastructure spending. From a top-down level, with 71% of our portfolio listed in the US and 41% of revenues arising in the US, the World Stars has a broad exposure to faster economic growth and potential reductions in the tax burden.

Walt Disney (+22%) reported strong FY2024 results, with 32% EPS growth, and provided EPS guidance for the next three years. This includes a robust demand outlook in the theme parks and cruise liners, and a 10% EBIT margin target in the DTC streaming business in FY2026. Confirmation of a substantial turnaround in streaming, driven by price increases and subscriber growth, is a significant element of our investment thesis on the stock.

Honeywell (+14%) was boosted by the news that Elliott Management, a leading activist investor, had taken a US\$5bn stake. Elliott's presence is likely to accelerate strategic change, which is already in process under the new CEO Vimal Kapur. He is focussing Honeywell on three growth mega-trends in industrials: automation, the future of aviation and energy transition.

GICS Sector Allocation
