

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, a model or hypothetical portfolio, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Inception is 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Net Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Fund. The total return index includes price performance and income after tax from regular cash distributions. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 31st December 2024.

Portfolio Comment

Our World Stars Global Equity fund had a good year in 2024 with significant progress overall. In December, performance was led by our consumer and digital companies, which accounted for five and four of the top ten stocks respectively.

In macroeconomic terms the US Fed forecast a slower decline in CPI during 2025. This lifted the 10 years Treasury yield to 4.6% (4.2%). However, US GDP growth is still forecast at 2% p.a. through 2025-26, and market expectations are for global GDP growth of c.3% p.a. over the same period.

We reduced our exposure to *Amazon, Meta, Nvidia and Alphabet* by about 450bps. All four have performed strongly. We still believe that they can deliver significant further growth and shareholder value, including a differentiated exposure to the AI revolution, but we decided to reallocate some capital to other opportunities.

We reinforced our positions in *Honeywell* and *Diageo*. Honeywell should benefit from increased investment in US domestic manufacturing and energy under the Trump administration. The business is also undergoing a strategic review under the new CEO Vimal Kapur, with a tighter focus on growth mega-trends in industrials. Diageo's forward P/E is about 20% below its ten years average at a time when underlying growth should improve. We have added a new position in *Intercontinental Exchange (ICE)*, a diversified financials business with a strong track record, EBIT margins of 59% and over 50% of its revenues recurring.

GICS Sector Allocation

- Information Technology 22.8%
- Health Care 16.9%
- Industrials 15.7%
