

**Investment Objective**

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 13<sup>th</sup> May 2019 is that of the Fund's A1 EUR Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars EUR Strategy, a model or hypothetical portfolio, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1<sup>st</sup> October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Net Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Fund. The total return index includes price performance and income after tax from regular cash distributions. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 28<sup>th</sup> February 2025.

**Portfolio Comment**

Global markets were impacted by increased geopolitical and macroeconomic uncertainty in February. Our World Stars Global Equity fund gave up ground after a strong January despite a robust Q4 results season for most of our companies.

The macroeconomic picture was mixed with concerns over the inflationary impact of US tariffs and a significant decline in US consumer confidence. The yield on 10-year Treasury bonds fell to 4.2% in February with the market now anticipating two cuts by the US Fed in 2025.

Nestle (+12%) was the top performer. The message from the new management team of increased urgency, significant cost savings to invest in innovation, higher marketing and stronger incentives should allow the company to return to its long-term growth algorithm.

Continued announcements of significant new investments in AI by global companies highlighted the opportunities for many of the stocks we hold, with digital and industrial companies providing the equipment and eco-systems, and others using AI to drive customer engagement and high margin revenues.

The resilience of our fund's performance provides evidence of the benefit of the greater diversification and lower valuations of our stocks. It also validates our decision at the end of last year to reduce some of the more highly-valued positions in technology companies.
